EDUCATION

University of Florida

August 2021 - May 2025

B.S. Computer Science | GPA: 3.9/4.0

- Dean's List: Fall 2023, Fall 2022, Spring 2022, Fall 2021

EXPERIENCE

Co-Founder and Software Engineer | React, Node.js, Express.js, PostgreSQL, Stripe, Azure

May 2023 - Present

Thrivia LLC | thrivia.ai

- Developed a full-stack web application for a generative artificial intelligence life coaching platform.
- Architected and implemented back-end infrastructure facilitating critical functionalities such as integrating with OpenAI, AI prompt engineering, user authentication and authorization, and third-party payment platform integration.

Engineering Undergraduate Researcher | AWS, Next.js, TypeScript, Tailwind CSS, PostgreSQL

August 2023 - Present

University of Florida, Computer & Information Science & Engineering | Gainesville, FL

- Led a team of five researchers as the project manager in the development of an AI-driven platform aimed at enhancing engineering technical interviews, overseeing project timelines, tasks, and milestones.
- Conducted preliminary data analysis and research, leveraging early findings to shape the platform's development strategy and enhance its performance and effectiveness.

Information Technology Intern | Next.js, TypeScript, Node.js

June 2023 - August 2023

Harper College | Palatine, IL

- Built an intuitive IT Service Catalog using Next.js, consolidating information from over 100 IT systems to provide Harper College employees with convenient access to system information.

PROJECTS

Pneumonia Prediction Utility | Python, Django, TensorFlow, Keras, React, Tailwind CSS

- Built and trained a TensorFlow Keras convolutional neural network using over 4000 posteroanterior chest X-ray images to classify each as normal, bacterial pneumonia, or viral pneumonia.
- Augmented training image data and weighed classes to improve prediction accuracy from 66% to 84.9%.

Online DICOM Viewer | Cornerstone.js, React, Tailwind CSS

- Developed a sophisticated radiological viewing suite, capable of processing and simultaneously displaying over 3500 DICOM medical imaging files within the browser. Implemented image orientation calculation, pixel-to-millimeter conversion, linear distance measurement, and comprehensive navigation tools (zooming, joystick, stack navigation).

NestQuest | HTML, CSS, JavaScript, jQuery

- Created a housing search service that calculates a user's optimal housing options based on a score derived from the combined distances to the nearest locations of their selected hobbies.
- Utilized Quick Sort and Merge Sort algorithms to process over 100,000 datapoints.
- Nominated by Data Structures & Algorithms course staff as one of the top projects in a class of over 450 students.

Glowbit | React

- Engineered a logic numbers game using dynamic programming concepts, implemented a memoization table where users must find the globally optimal path from start to finish with the greatest sum.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, C++, Java, SQL, HTML/JSX, CSS, MATLAB

Frameworks/Libraries: Next.js, React, Tailwind CSS, Express.js, Socket.io, jQuery, SFML, JUnit

Databases: PostgreSQL, MySQL

Developer Tools: Node.js, Docker, Azure, Git/GitHub, npm and yarn

Other: Generative AI, API Integration and Development, Project Management, Unix CLI, Graphic Design, Mathematics, Bike Repair, Music Production (Logic Pro)

LEADERSHIP EXPERIENCE

Individual Involvement Consultation Captain

May 2022 - May 2023

University of Florida Involvement Team

- Served as an executive board member for the Student Activities and Involvement department's official ambassador organization. Assisted students in finding their place on campus through personalized consultations and events.

Eagle Scout

November 2018

Boy Scouts of America

- Led a team of volunteers in the design and construction of a paver patio and memorial plaque on the back lawn of Saint Viator High School, serving as my final Eagle Project.
