EDUCATION

University of Florida

August 2021 - May 2025

- Bachelor of Science, Major in Computer Science, Minor in Mathematics | GPA: 3.87/4.0

EXPERIENCE

Software Engineer Intern

May 2024 - August 2024

Southwest Airlines | Dallas, TX

- Implemented full-stack, event-driven architecture using AWS Lambda and DynamoDB to support a new account feature expected to increase Rapid Rewards sign ups by 2% and user engagement levels by 10%.
- Modernized the Ops Suite software for Superintendents of Dispatch in the Network Operations Control (NOC) by designing and implementing reusable React components and integrating with backend AWS services.
- Participated in SAFe agile ceremonies such as daily stand-ups, program increment (PI) planning, and retrospectives, ensuring alignment with team goals and delivering high-quality features on schedule.
- Recognized as the intern who is "Most Likely to Juggle 5+ Projects at Once" by peers and leaders.

Information Technology Intern

June 2023 - August 2023

Harper College | Palatine, IL

- Built an intuitive IT Service Catalog using Next.js (React) and TypeScript, consolidating information from over 100 IT systems to provide Harper College employees with convenient access to system information.
- Collaborated with Access and Disability Services to establish accessibility guidelines for IT acquisitions.

Co-Founder and Software Engineer

May 2023 - August 2024

Thrvia LLC | thrivia.ai

- Developed a full-stack React web application powering a generative artificial intelligence life coaching platform.
- Architected and implemented back-end infrastructure with Express.js, integrating PostgreSQL database interaction via Prisma ORM, OpenAI APIs, Stripe secure payment processing, AI prompt engineering, and user authentication/authorization.
- Deployed and managed on Microsoft Azure Static Web Apps and App Services, leveraging CI/CD pipelines with GitHub Actions to streamline testing and production deployments.

Engineering Undergraduate Researcher

August 2023 - Present

University of Florida, Computer & Information Science & Engineering | Gainesville, FL

- Led a five-person research team as project manager in the development of an AI-driven technical interview platform, managing project timelines and deliverables while coordinating cross-functional development efforts.
- Leveraged a scalable AWS infrastructure utilizing EC2, Docker, and S3 to enable real-time code execution and automated assessment, creating an interactive environment for remote technical interviews.

PROJECTS

Pneumonia Prediction Utility

- Built and trained a TensorFlow Keras convolutional neural network using over 4000 posteroanterior chest X-ray images to classify each as normal, bacterial pneumonia, or viral pneumonia.
- Augmented training image data and weighed classes to improve prediction accuracy from 66% to 84.9%.

Online DICOM Viewer

- Developed a sophisticated radiological viewing suite using Next.js (React) and Cornerstone.js, capable of processing and simultaneously displaying over 3500 DICOM medical imaging files within the browser.

NestQuest

- Created a housing search service that processes 100,000+ datapoints using Quick Sort and Merge Sort algorithms to calculate optimal housing options based on proximity to users' selected activities.
- Nominated by Data Structures & Algorithms course staff as a top project among 450+ students.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Java, C/C++, SQL, HTML/JSX, CSS

Frameworks & Libraries: React, Next.js, Express.js, Tailwind CSS, Socket.io, TensorFlow

Cloud & DevOps: AWS, Azure, Docker, Git/GitHub, npm, yarn

Databases: PostgreSQL, MySQL, DynamoDB

Other: Agile Methodologies (SAFe), API Development, Project Management, Mathematics

LEADERSHIP EXPERIENCE

Eagle Scout | Boy Scouts of America

November 2018

- Designed and led construction of a memorial patio, managing a team of volunteers for a community project.
